STUDENT COMMUNITY INVOLVEMENT PROJECT COMPETITION

The Student Community Involvement Project Competition is a statewide competition that recognizes student organizations, clubs, or classes at the SC Technical College System's colleges across the state for excellence and professionalism in community service and engagement. A panel of reviewers will score entries according to the specifications below. Award winners will be notified, and representatives from the groups submitting these projects will be invited to the SCTEA annual conference on Friday, February 21st for recognition.

ELIGIBILITY GUIDELINES

- All student organizations or clubs are eligible to enter the competition. Reports from class service projects may also be entered.
- Entries must have taken place between January 1, 2024 and December 15, 2024.
- Multiple entries for the same service project will not be accepted.
- All entries must have been performed by students. Entries can be submitted by the student, instructor, advisor, or student affairs staff. Advisors, instructor, or student affairs staff may assist in drafting the report by following the criteria for submission.
- The deadline for entering the competition is December 15, 2024.
- Please use the online application form at <https://sctechsystem.wufoo.com/forms/student-community-involvement-project-competition/> or scan the QR code on this flyer.

NEEDS, GOALS, & INSTITUTIONAL ALIGNMENT (0-20 POINTS)

What community or campus needs does the project address? How does the project support or align with the college's and/or student organization's mission statement? What were the goals of the project?

CAMPUS & COMMUNITY OUTCOMES (0-30 POINTS)

Describe the impact of the project on the campus and local community. What were the outcomes of this project; share specific outcome numbers and/or anecdotes. Are there potential long-term impacts of the service project?

ORGANIZATIONAL PROCESS AND NEXT STEPS (0-30 POINTS)

What were the steps to implement and organize the project from start to finish? Were there groups or other students with whom you collaborated to complete the project? What challenges or limitations arose during the project, and what did you learn as a result of those challenges or limitations?

INNOVATION & REPRESENTATION (0-20 POINTS)

Please upload any publications or visual representations that support the criteria listed above. Points will be awarded for creativity, clarity, and innovation of the information submitted with your project.
